DNSSEC Validation % Among APAC Regions

Since the HKIRC officially announced the signing of "Domain Name System Security Extensions" (DNSSEC) for ".hk" and ". 香港 " domain names in May 2017, Hong Kong has remained one of the leading DNSSEC-deployed regions in APAC, with a DNSSEC validation rate of 44.6% (as of early January 2026). contributing to a secure, stable and interoperable environment for both local and global Internet communities.

DNSSEC is a crucial security measure that adds an additional layer of protection to the DNS lookup and exchange processes. By implementing digital signatures, DNSSEC enhances the authentication process within the DNS infrastructure. Unlike signing DNS queries and responses themselves, DNSSEC focuses on signing the actual DNS data, thereby ensuring its authenticity and integrity. This robust security mechanism serves as a safeguard against various cyber attacks, including DNS spoofing, man-in-the-middle attacks, data modification, and cache poisoning. These attacks involve malicious actors redirecting queries to unauthorised domains. By leveraging DNSSEC, organisations and individuals can confidently access websites that have not been tampered with, thereby guaranteeing the legitimacy of their online interactions. It is highly recommended for any entity that prioritises the security and integrity of their DNS data.

亞太地區 DNSSEC 驗證率比較

自 2017 年 5 月 HKIRC 正式宣布為香港地區域名「.hk」及「. 香港」簽署「域名系統安全擴充」(DNSSEC) 以來，香港的 DNSSEC 驗證率一直於亞太區內保持名列前茅。截至 2026 年 1 月上旬，香港的 DNSSEC 驗證率達 44.6%，為本地及國際互聯網社群提供一個穩定、互通的網絡環境。

DNSSEC 是一項重要的安全措施，它為域名系統查詢和交換程序增添了額外的保障。透過實施數位簽名，DNSSEC 增強了域名系統基礎設施內的身份驗證流程。有別於簽署域名系統查詢和回應，DNSSEC 專注於簽署實際的域名系統數據，從而確保其真確度和完整性。這種強大的安全機制可以防範各種網路攻擊，包括域名系統欺騙、中間人攻擊、資料修改和快取中毒等，這些攻擊都會將惡意攻擊者的查詢重新導向到未經授權的域名。透過利用 DNSSEC，組織和用戶可以放心地訪問未被篡改的網站，從而確保在線上互動能合法進行，強烈建議優先考慮域名系統資料安全性和完整性。

Registrar Accreditation Programme

Registrar Accreditation Programme was launched in 2011, with an aim to encourage fair competition, enabling more choices to customers and ultimately increase the number of ".hk" and ". 香港 " registration uptake. Customers are free to choose their preferred registrar who is able to offer one-stop Internet services to meet their specific needs. In 2025, there were a total of 47 registrars, including 13 from local Hong Kong market, 11 from Asia, and 23 from other regions.
